pdf) and paste in the year 2015, u can find the final exam question. However I could not find the question, someone please help me? thanks A: Kisah Nabi was a Malay news site and is no longer available. However, I don't think that the data is held at the university level. It should be available at the local library level. Your only chance is to check your university library.

1. Field of the Invention The present invention relates to a light-emitting element control device, light-emitting element control system and light-emitting element control method for driving a light-emitting element, such as an organic EL (Electroluminescence) light-emitting diode or an inorganic EL light-emitting diode, in accordance with image data.

2. Description of the Related Art Conventionally, a light-emitting element control device has been widely used, in which image data obtained by reading an image of a document or an image of a printed image are sequentially converted into a video signal and then output to a light-emitting element, and the light-emitting element is controlled in accordance with the video signal. Further, the light-emitting element control device is applied to a display device having the following configuration. That is, a light-emitting element control device having a light-emitting element on a display panel, in which a first storage region stores an image signal obtained by reading the document or the printed image, a second storage region stores information of the color of the light-emitting element, and a controller controls the light-emitting element based on information stored in the second storage region, is proposed. For example, Japanese Unexamined Patent Application Publication No. 2005-23914 discloses a display device in which a light-emitting element is driven by an image signal obtained from a video signal of a printer obtained by reading a document. Further, Japanese Unexamined Patent Application Publication No. 2002-233897 discloses a printer in which a light-emitting element is driven based on the color of the light-emitting element stored in a memory. Further, Japanese Unexamined Patent Application Publication No. 2002-264682 discloses a light-emitting element driving device in which a light-emitting element is driven in accordance with the area information of the document stored in a memory.Q: "The f3e1b3768c
